TITLE INDEX

Adsorption, step-wise, of nitrogen on carbon black (Garelick and others), 305.

Bauhinia tomentosa, Linn., flower petals, colouring matter (Row and Viswanadham), 240.

Benzil, the rotatory dispersion (Chandrasekhar), 243.

Benzopyrone series, synthetic experiments, XLI (Krishnamurti and Seshadri), 144; XLII (Mahesh and others), 165; XLIII (Goel and others), 254; XLVII (Ahluwalia and Seshadri), 296.

Carajurone hydrochloride, a synthesis (Miss Ponniah and Seshadri), 45.

Chromone group, synthetical experiments, XXX (Ramanathan and Venkataraman), 90.

Crystal, degree of perfection, investigation, by means of polarized X-rays (Ramaseshan and Ramachandran), 20.

Crystals, theory of elasticity and of wave propagation, from the atomistic standpoint (Viswanathan), 196.

Crystals, X-ray anti-reflections, II (Ramachandran), 65.

Fibres, natural and synthetic, some, the structure and optical behaviour (Raman and Bhat), 109.

Gypsum, on the polycrystalline forms, and their optical behaviour (Raman and Ramdas), 153.

Hæmatite and magnetite ores, determination of iron, substitutes for the Zimmermann-Reinhardt reagent (Somasundaram and Suryanarayana), 41.

Harmonic analysis, practical methods, for geophysical problems (Kane), 117.

Infra-red absorption spectrum of barytes (Ramdas), 81.

Lennard-Jones Devonshire equation of state, application, to detonation of Petn (Murgai), 176.

Magneto-optic rotation and optical dispersion in some halogen acids and their salts, the relation between (Sivaramakrishnan), 31.

Manganiferous micas from Madhya Pradesh, India (Sripadrao Kilpady and Dave), 53.

pi-Mesons, neutral, production frequency, in high energy interactions (Lal and others), 127.

Micro-climatic measurements, a sturdy thermoelectric psychrometer (Raschke), 98,

Naphthoquinone series, V (Suryanarayana and Tilak), 185.

Pearls, the chromatic diffusion halo and other optical effects exhibited by (Raman and Krishnamurti), 265.

Pearls, the structure and optical behaviour (Raman and Krishnamurti), 215.

Quartz, temperature variation of the rotatory power, from 30° to 410° C. (Chandrasekhar), 290.

Quinolizine derivatives, synthesis (Govindachari and Thyagarajan), 232.

Relativistic particles in high energy showers (Rama), 162.

Rocks, preferred orientation, and its relation to their physical properties (Balakrishna), 223.

Semecarpus travancoricus, nuts, resinol from (Puntambekar and Beri), 137.

Shells, iridescent, the structure and optical behaviour (Raman and Krishnamurti), 1.

Surface active substances at the dropping mercury electrode, behaviour, at different frequencies of the applied field (Gupta), 282.

Tauberian series, theory of, on an absolute constant in (Rajagopal), 272.

Thespesia populnea, seeds, oil from, analysis and characterisation (Subbaram), 301.

Thiophenes and thiapyrans (Ghaisas and Tilak), 14.

Ultrasonic velocities in liquids, investigation, by a new method (Rao and Rao), 132.
